Contract formulas are the only formulas allowed unless a prescriptive authority has completed a Request for Substitution form for a non-contract brand formula. Non-contract brand formulas are available **only** when there is a documented medical reason on the Request for Substitution form. The WIC certifier or health care provider has the option to provide, on an individual basis, additional formula beyond that available for children. This policy applies to the Special Food Package for children over age 1 and women with special nutrition needs.
